

Medical Resources for Community Cats

While we are dedicated to providing high-volume spay/neuter and vaccine services to our community, we do not have the capacity to offer comprehensive medical care for outdoor cats at the moment. We encourage you to seek treatment for issues such as upper respiratory infections and injuries at a full-service veterinary clinic.

To assist you, we have gathered a list of local veterinary practices that are equipped to handle outdoor Community Cats. We suggest contacting them in advance, as each clinic will have its own procedures, rates, and appointment schedules for treating outdoor cats.
